

WORKFLOW MODEL

WORKFLOW MODEL

In the printing industry, PRIME interfaces provide simple, standardised solutions to connect control desks, roll handling and tracking systems, and to integrate the printing process with pre-production and the mailroom.

Well-known manufacturing companies within the graphics industry have come together under the name PRIME NETWORK to develop common standards for an efficient workflow in newspaper production. Members use their knowledge of the industry to develop sustainable solutions that can be implemented easily.

Using its valuable knowledge
